Concordia's PEAK Difference

Our signature integrative learning program (**PEAK**) will give you an edge in future academic and occupational endeavors. All Concordia graduates will have at least two Pivotal Experience in Applied Knowledge opportunities in their portfolio. Your PEAK might be a special course, an internship, a global learning experience, or a service project.

PIVOTAL

PEAKs take your education up a notch. They are a transformative part of your Concordia experience.

EXPERIENCE

Get ready to be engaged. You can't complete a PEAK while standing still.

APPLIED

You will take something you've learned here and apply it elsewhere (through internships, service learning, study away, and more).

KNOWLEDGE

PEAKs require you to use your classroom learnings to address real-world issues.

ConcordiaCollege.edu/PEAK

Concordia College will become your home away from home. Check out this **First-Year Experience Guide** to learn what to expect.

STUDENT EXPERIENCES

Jiachen Song '23 | Political Science

Hometown: Taizhou, Jiangsu

International Master of Public Administration, University of Pennsylvania

While studying at Concordia, Jiachen studied for a semester in Washington D.C. This experience helped him learn valuable skills that allowed him to gain admission to graduate school.

Best part of Concordia: "The teachers here are among the kindest you will encounter in the United States. They go above and beyond to assist you in your personal life or academic endeavors. Due to the school's small size, all Chinese students bond like a family. Moreover, the professors at Concordia deeply embody the principles of a liberal arts education. If you aspire to pursue graduate studies in the future, they will undoubtedly write outstanding recommendation letters for you. The small class sizes allow them to understand each student fully."

Yishui Dai '22 | Business Marketing

Hometown: Datong, Shanxi

Master of Science in Business Analytics, Pepperdine University

Yishui "David" Dai says he made lifelong friends at Concordia thanks to the guidance and mentorship of his professors.

Best part of Concordia: "Concordia's focus on applying what we learned in class to real-world situations seriously sharpened my analytical and problem-solving skills. We dove into loads of projects that mirrored actual challenges in the marketing world, giving me a solid grasp of market trends and consumer behaviors. This hands-on approach helped me not just understand the theories but also build up my confidence. Now, in my job, I often rely on the discipline and resilience I developed at Concordia. A big takeaway from my time there was learning to see setbacks as opportunities for growth."

Yuehan Zhao '23 | Communication Studies

Hometown: Zhengzhou, Henan

Master of Science in Marketing, George Washington University

Yuehan Zhao encourages Chinese students to talk to their professors and make connections. Yuehan completed a semester of independent research with Dr. Jiani Jiang that led her to present at a conference in Texas.

Best part of Concordia: "I have a lot of good memories at Concordia, but the best memory is the experience of eating and talking with my friends in the dining center. I remember The Maize's fries being my favorite at school. Concordia's dining center has the most welcoming atmosphere and warm food. The annual Thanksgiving meal is also a cherished memory for me."

Wendi Qi | Exchange Student

Hometown: Zhuhai, Guangdong

Best part of Concordia: "I had an unforgettable experience this semester because of the excellent class ratio and beautiful college environment. Talking in English improves my listening and speaking skills a lot. I love music too, and I watched at least eight music performances at Concordia. That's really cool!"

Concordia College is investing in YOUR future

#1
NURSING PROGRAM
IN MINNESOTA
RegisteredNursing.org, 2024

20+ new programs are launching this year, including:

Applied Data Analytics

In addition to offering a computer science major with a data analytics concentration and a minor in data analytics, an applied data analytics certificate is now available for students interested in delving more into the world of analytics. This certificate will empower students with practical knowledge and skills essential for thriving in data-centric fields.

Data Science

At 10 courses, the data science major is intentionally slimmed down compared to similar programs in the region to allow Concordia students the opportunity to pursue a second major or minor in an area that uses data. Due to the significant overlap in coursework, students may not major in data science and major in computer science with a data analytics concentration.

Financial Planning

The financial planning minor will introduce students to the field of financial services. Graduates will be prepared to take industry certification exams, such as the Certified Financial Planner (CFP) designation. This certification is globally recognized and respected and can significantly enhance a resume and earning potential.

Human Resource Management

The human resource management minor and business major with a human resource management concentration includes an internship in an HR office in the community, which provides a foundation to pass the Society of Human Resource Managers first certification exam and a pathway to the professional credential.

Pre-Engineering

Concordia offers three dual-degree program options in partnership with North Dakota State University in Fargo, Valparaiso University in Valparaiso, Indiana, and Washington University in St. Louis, Missouri. Students will complete three years of coursework at Concordia for a Bachelor of Arts degree in applied science followed by two years at a partner institution for a Bachelor of Science degree in engineering.

Project Management

The project management program, which includes the option to minor in project management or major in business with a project management concentration, is focused on emerging trends and industry specialization through an interdisciplinary approach. Graduates will be eligible to take the Certified Associate in Project Management (CAPM) exam, a globally recognized certification from the Project Management Institute.

Supply Chain Management

The supply chain management major and minor are designed to be interdisciplinary to provide students with a comprehensive understanding of the interconnected worlds of supply chain management, global economics, leadership, and data analysis.

PAYING FOR COLLEGE

A Clear Approach to Tuition + Aid

SCHOLARSHIPS

Merit-Based Awards

International Excellence Scholarships range between **\$11,000-\$17,000** and are awarded upon admission to new international students. These awards are renewable. Amounts are determined by strength of academic performance.

Concordia Scholarship Interview

Admitted students may receive additional support from Concordia College based on their financial need. Student seeking need-based support must participate in a Concordia Scholarship Interview and may need to submit additional documentation in advance. Students and their financial sponsors are expected to pay a minimum of \$26,000 per year for educational expenses.

2024-25 COST OF ATTENDANCE

Tuition and fees	\$33,195
Housing and food	\$11,000
Books and personal expenses	\$4,400
TOTAL	\$48,595
– Average Total Scholarship	\$14,995
– Average Student Work Study	\$3,600

NET Price (What You Pay) \$30,000*

*Assumes you plan to work on campus part time.

FEATURED ACADEMIC PROGRAMS

COMPUTER SCIENCE

Understand the basics of computing, software development, server administration, and cybersecurity. Concordia's data analytics team frequently places first in the Midwest Undergraduate Data Analytics Competition.

STEM

Concordia offers majors and minors in eight STEM fields, including biology, chemistry, computer science, data science, environmental and sustainability studies, mathematics, neuroscience, and physics.

GLOBAL STUDIES

Take a wide range of classes to explore issues facing the global community that match your unique passions and interests. A great fit for students who love exploring international issues and culture, care about global issues, and can work independently.

BUSINESS

The most popular major at Concordia is business. The program offers seven concentrations: cybersecurity, economics, finance, human resource management, management, marketing, and project management.

FINANCE

Study cutting-edge curriculum in our state-of-the-art finance lab and gain hands-on training with real trading systems, including the \$130,000 student-managed Scheel Investment Fund.

HEALTH PROFESSIONS

Housed in a new state-of-the-art building, the Sanford Heimarck School of Health Professions offers several academic programs that provide students with opportunities for experiential learning.

STILL DECIDING?

Concordia students often change majors and nearly one-quarter choose to double major. Faculty advisors provide ample support and direction to help students determine their course route.
