

Concordia College Instrumental Ensemble

FLUTE Audition Materials

Auditions for placement into concert bands, orchestras and jazz ensembles take place during the week in which classes begin each fall. General information, including the audition schedule is available under the "Ensembles" link on the Music Department web page <www.ConcordiaCollege.edu>. All musicians wishing to audition for placement into instrumental ensembles must prepare and perform the following audition components:

Prepared Selections: Select and prepare TWO excerpts of your choosing. The first excerpt should be approximately 90 seconds in length and demonstrate your finest lyrical/expressive playing. The second excerpt should be approximately 90 seconds in length and demonstrate your finest technical playing. Etudes from a method book or portions of a solo composition are appropriate.

Sight Reading: A short sight reading exercise will be provided at the audition. You will have approximately 30 seconds to study the exercise silently before performing it to the best of your ability.

PICCOLO - Those flautists who would also like to audition on piccolo should prepare a 90 second excerpt on piccolo as well. The piccolo excerpt will be heard during the musician's flute audition (e.g. a separate audition time is not needed).

MUSICIANS WISHING TO BE CONSIDERED FOR PLACEMENT INTO THE CONCORDIA BAND AND/OR THE CONCORDIA ORCHESTRA MUST ADDITIONALLY PREPARE AND PERFORM THE FOLLOWING AUDITION COMPONENTS:

Chromatic Scale: Perform the scale using the indicated articulations at a tempo that enables you to perform the scale accurately and with the best tone quality.

Tonguing: Select any two-octave major scale and perform the following rhythmic pattern on each tone of the scale ascending and descending. The minimum tempo for this exercise is quarter note = 144.

QUESTIONS? If you have questions regarding any aspect of the audition material, please contact Professor of Flute Debora Harris at <harris@cord.edu> or Director of Bands Dr. Peter J. Haberman at <phaberma@cord.edu>.
