# Building a More Trustworthy World

CONCORDIA COLLEGE | LORENTZSEN CENTER FOR FAITH AND WORK

Dear Friends,

We invite you to join us for a thought-provoking lunch conversation with author and technology leader Todd Lefor, whose work explores artificial intelligence with humor, clarity, and insight.

Artificial intelligence can access more knowledge than any individual ever could. But the future will not be defined by who knows the most — it will be shaped by those who imagine what is possible. In this engaging talk, Lefor will explore how imagination, curiosity, and creative thinking will shape the next era of technology.

Drawing from his book "I Wonder if Stella Thinks About Me: Tesla, Minions, & Artificial Intelligence," Lefor will unpack the promises, tensions, and human questions surrounding AI in ways that are accessible, lively, and deeply relevant. Whether you are curious about emerging technologies or interested in how AI is reshaping our world, this conversation promises fresh perspectives and meaningful dialogue.

Date: Wednesday, March 25

Time: Noon-1:15 p.m.

Location: KCC Centrum, Concordia College (also available via Zoom)

Lunch is included.

Todd Lefor is the author of the Barnes & Noble best-selling book "I Wonder if Stella Thinks About Me: Tesla, Minions, & Artificial Intelligence." He has spent more than 40 years developing enterprise software systems for Fortune 500 companies — including 25 years at Microsoft — and holds 17 software patents.

We hope you can join us for this timely and engaging conversation.
