

UNDERSTANDING FoodPro

The FoodPro menu system is used not only to see what will be served each day, but also to identify the top 9 allergens as well as a variety of food traits. You can even filter based on your needs!

The screenshot shows the FoodPro menu system interface. At the top, there is a maroon header with the Concordia College logo and the text "Dining Services". Below the header, the main content area is titled "Anderson Commons" and "Menus for Monday, June 15, 2026". The menu is categorized by "Lunch" and lists items such as "Comfort Entree", "Comfort Side Dishes", and "Slice". Each item is accompanied by icons representing allergens and food traits. A callout box on the left highlights the "Legend" section, which defines the icons: a red heart for "Contains Beef", a green triangle for "Cross Contact", a yellow circle with a wheat stalk for "Gluten Friendly", a pink pig for "Contains Pork", a green leaf for "Vegetarian", and a blue checkmark for "Vegan". Another callout box on the right highlights the "Allergen Filters" section, which allows users to select "Contains" or "Does Not Contain" for various allergens: Milk, Eggs, Fish, Shellfish, Tree Nuts, Peanuts, Wheat, Soy, Sesame, Gluten, and May Contain. A "Legend Filters" section also allows users to select "Contains" or "Does Not Contain" for the same food traits as the legend. At the bottom of the filter section are buttons for "Cancel", "Reset", and "Apply".
